

IMPACT GX MINI

Pro Tools and Impact GX Mini Setup and Working Together

Avid Pro Tools is a closed environment that doesn't offer the same external control as other DAWs. However you can set up your Impact GX Mini for use with Pro Tools by following these steps:

First you will need to set the Impact GX Mini keyboard to USB Port Setup Mode 4:

- Press the 'Setup' button. The Setup button's LED will light up.
- Press key C2 (labeled 'USB Port Setup'). The Setup button LED will begin to flash.
- Press key A#1 (labeled '4').
- Press key C3 (labeled 'Enter'). The Setup button LED will turn off.

Now it's time to launch Pro Tools.

- With Pro Tools open go to the 'Setup' menu and select 'Peripherals'.
- In the Peripherals menu, go to the 'MIDI Controllers' tab, then configure the following settings:

Type: 'M-Audio Keyboard'

Receive From: 'MIDIIN2 (IMPACT GX Mini) [Emulated]' in Windows 'Impact GXMini MIDI2' in MacOS

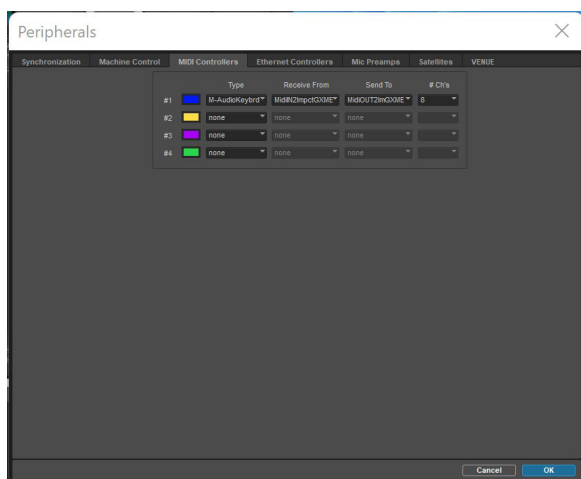

Send To: 'MIDIOUT2 (IMPACT GX Mini) [Emulated]' in Windows 'Impact GXMini MIDI2' in MacOS

- Click 'OK'.

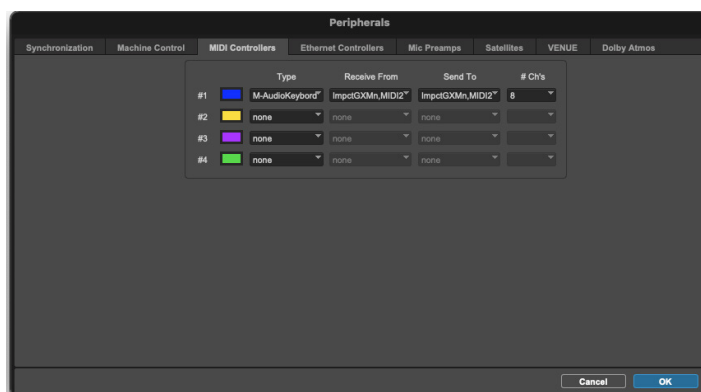

If everything is configured correctly, you should see the Impact GX Mini's MIDI ports configured as shown below..

Now your Impact GX Mini is configured in Pro Tools.

Windows

MacOS
